Subject: Early Notice - LANL Operational Status for Subcontractors

Dear LANL Subcontractor:

This notice is to inform you that Los Alamos National Laboratory (LANL) continues to operate under normal business conditions during the federal government shutdown. At present, there are no changes to Laboratory operations, and subcontracted work should proceed as scheduled. We recognize that as the federal government shutdown continues it could impact Laboratory activities in the future. LANL is closely monitoring developments and will issue formal guidance should any changes to subcontract activities become necessary.

We appreciate your continued cooperation and commitment to supporting LANL's mission.

Sincerely,

Christine Hipp
Deputy Division Leader for Operations
